# Memention Software *Shop*

*"Create, Share and Earn"*

# Software on the *Net*

- Open Source
- Shareware
- Browser client

# Open Source

- Collaborative effort
- Often monolithic and hard to use
- Can have many requirements
- Many Licensing schemas
- Mostly not for ordinary users
- Pay with time and effort

# Shareware

- Try before buy
- Working programs
- Often built around one function
- Pricing from ~20 USD
- Payment services like Kagi.com and eSellerate.com

# Browser client

Run from within the Internet browser

- Java
- Shockwave

# The Software Shop *Idea*

- Internet service
- Component based
- Pay once

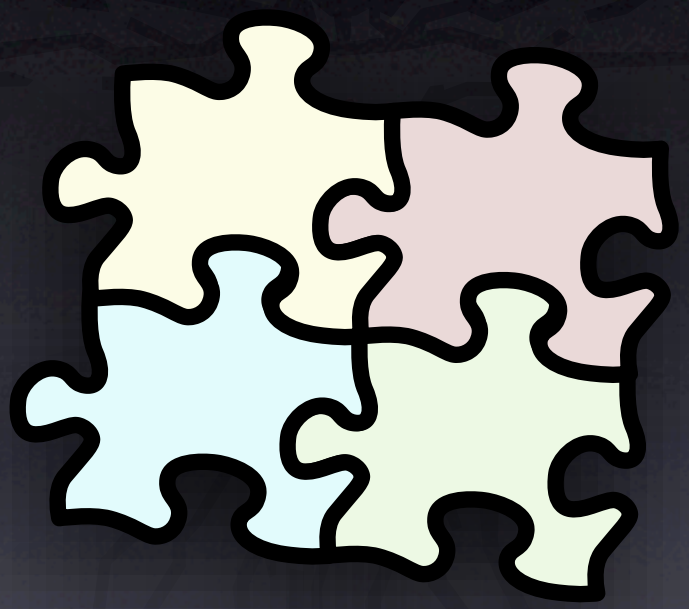
# “Shop”

*<u>Shop</u> was selected because it can both stand for a Shop where none-developers can buy software and for Shop as in Workshop for software developers to exchange software components.*

# Internet Service

- Storage
- Search
- Forums for Q&A
- Client program
- Purchase

# Component based



*A Program will be a component with User Interface*

# Pay once

*A user will only pay for the needed components*

*First purchased program will cost all the needed components and afterwards one will only have to pay for the components needed but not already purchased*

# Overview

User

The *Shop*

- Components
- Search
- Forums

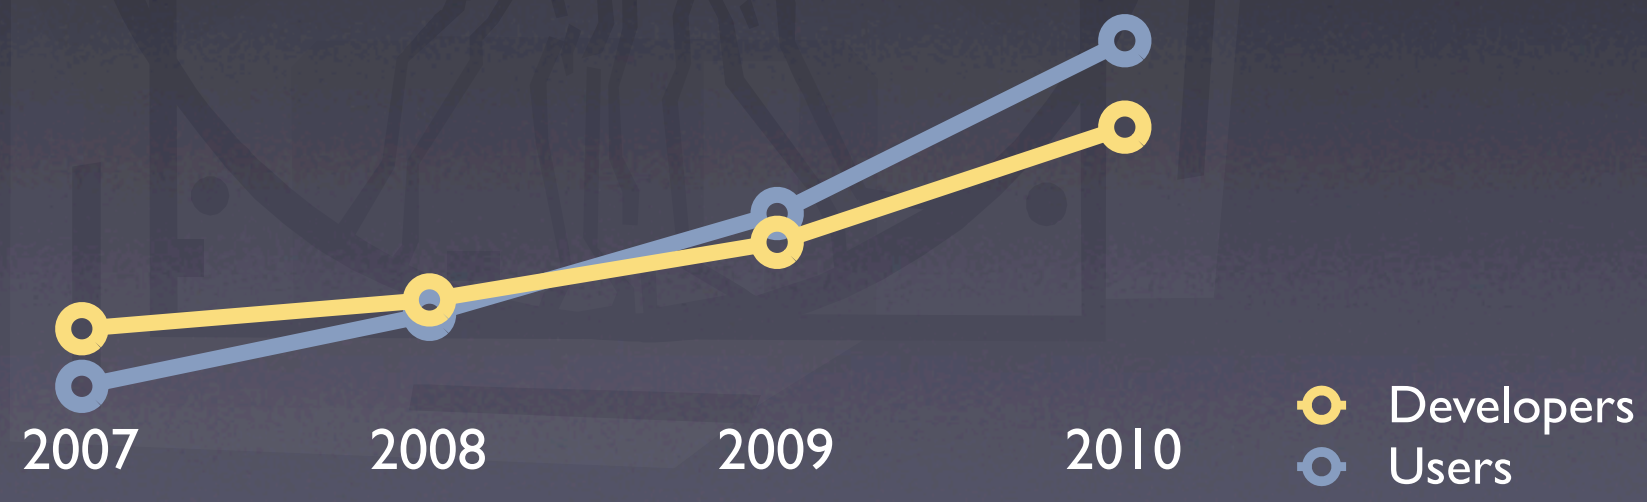
Developer

# Implications

- Cheap for developers to buy and use others components
- Developers can focus on their expertise

# 2 Phases

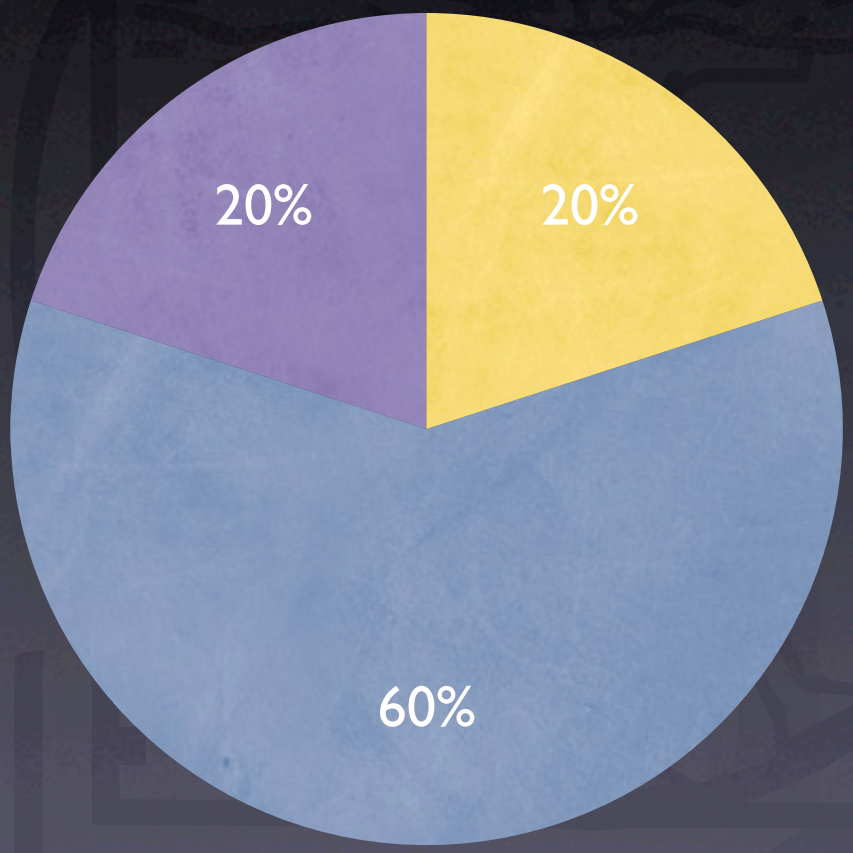
- Initial phase is developer centered, developers is finding it and starting to use
- When enough User Interface components are available for ordinary users the second phase will start



# Building it

- Initial need of developers to create technical foundation
- Keep service running and safe
- Micro payments
- Legal issues
- Marketing
- (Investigate OEM possibilities?)

# Company Structure



- Mention AB
- Angel Investors
- CEO&Employees

# What is needed

- A CEO with vision
- A few good developers*
- A few good web service creators*
- Money (5-10 million SEK first years)

*or consultants

# Exits

- IPO in 4 years?
- Bought up by a dominant Internet company (Microsoft, Google, Apple)
